But for people, it expresses itself much worse than for others. Anxiety symptoms that go beyond the typical expressions of unease and nervousness should not be ignored. While many people can expect to suffer [buy ipratropium in Australia](#) anxiety attack at some point in their life, recurring episodes of extreme anxiety are definitely not normal. A large European research firm was commissioned to investigate the causes and implications of sleep problems from a medical as well as from a social point of view. Since our environment is changing into a 24/7 society, people are now having less time to sleep. The research focuses on the role of sleep in the quality of life; in mood disorders and how it can affect performance, accident rates, and cardiovascular diseases.

One group from the research investigated sleep patterns during a normal week. They found out that following sleep restriction to four hours per night, an individuals ability to perform complex tasks gradually decreased during the five days. Another group has shown ways in which the social context of everyday life has influences on sleep quality. Interviews with women in Italy show how womens sleep is disturbed by care giving roles, especially for elderly relatives. Large scale surveys from the study made the conclusion of strong social inequalities in sleep problems with poorer sleep recorded for people living in disadvantaged social situations, such as low income or low educational attainment.
